

FULGURA

MULTI-FLOW

QUENCHING

FURNACE

ECM
TECHNOLOGIES

The Fulgura multi-flow quenching furnace ensures great performance. The heating elements (1 to several elements) produces low amplitude homogeneities. Nozzles located around the load guarantee rapid homogeneous cooling whatever the type of parts.

Specifications			
Model	Length	Width	Height
60-45-40	600	450	400
90-60-60	900	600	600
120-90-85	1200	900	850

OPTIONS

- Secondary vacuum (with turbo pump)
- Convection up to 750°C
- Gas quenching (10 bar max.)

- Quenching of tool steels
- Hyper quench of stainless steel
- Brazing
- Low pressure carburizing
- Tempering
- Annealing
- Ageing
- Sintering
